## *Fitzsimmons "Leg Paint"*

Has been used by Mr. James E. Fitzsimmons and other leading horsemen with great success for treating many common ailments of the horse caused by undue strain, sore knees, bucked shins, etc.

Fitzsimmons "Leg Paint" may be used either with or without a bandage but best results have been obtained when the leg is painted twice a day and covered with cotton and bandage or for a good "sweating", in addition to the cotton and bandage, covered with rubber or oiled silk.

Get a bottle of Fitzsimmons "Leg Paint" from your dealer today,
