Dear Mr Fitz

John and I were filled with pride — and tears on Saturday when we watched you honored by so many admirers — we said to our friends, "we know him well!"

We honestly believe that because of you, we learned to love watching horses run races. You are totally responsible for our survival at the betting windows. How many times we have reminded ourselves that

"Mr Fitz says there's no sure thing!"

We wish you good health for the years ahead so that you may enjoy being lazy — you've never known that luxury!

affectionately yours,
Kathryn and John Rogers
